SEP 28 1956

General K. D. Fields
General Manager
Atomic Energy Commission
Washington, D. C.

Dear General Fields:

The Central Intelligence Agency is currently planning the construction of a new headquarters building at Langley, Virginia. It is our objective to eventually produce the Agency's classified printing in this headquarters area. This will require the facilities of the Government Printing Office - State Service printing plant located at 2430 E Street, N. W. Discussions have been initiated with the Public Printer and the staff of the Joint Committee on Printing concerning the transfer of the administrative control of this plant to the Central Intelligence Agency. If the transfer is approved, this Agency is prepared to furnish the Atomic Energy Commission and other customer agencies the same service with respect to classified printing as they have heretofore received from the State Service plant.

The proposed transfer has been discussed with Mr. C. H. Little, Chief, Publications and Visual Aids, Atomic Energy Commission, to determine if it involves any problems of concern to the Atomic Energy Commission. The discussion indicated that the transfer raises no problems and that it would be satisfactory to the Atomic Energy Commission.

This letter is to confirm the discussion with Mr. Little, and to request the formal concurrence of the Atomic Energy Commission to the transfer of the Government Printing Office - State Service printing plant to the administrative control of the Central Intelligence Agency.

Sincerely yours,

SIGNED

W. Bates Lloyd
Deputy Director
